

Abstract Collection

Paint the Sky Duration 4 minutes

This AV uses photographs by NASA from the Hubble space telescope amongst others to illustrate the words of a spiritual song that captures the emotions and thoughts that one might have when viewing the wonders of the night sky.

The Changing Sky Duration 5 minutes

We do not often sit and watch the sky as it changes during the day. In this AV we use music and a collection of photographs of the sky taken from our house over many years to illustrate the many and varied moods of the sky that make up the British weather.

Night Lights Duration 7 minutes

Shot mainly in London, this presentation aims to exploit the effects of night lighting to produce an up-beat, fast moving and predominantly colourful show.

Photographer's Garden Duration 8 minutes

We visit a garden which is not important enough to be open to the public, but which when viewed through the photographer's lens takes on extraordinary qualities. We follow the life of the garden through the seasons, in an intriguing presentation.
